

## The plan

# 12 WEEKS TO IRONMAN

TEST YOUR METTLE IN THIS INFAMOUS ENDURANCE RACE WITH OUR EXPERT PLANS

## Meet the expert

**Phil Mosley**

Coaching editor of *Triathlon Plus* Mosley has coached dozens of triathletes to Ironman success

**IRONMAN IS the ultimate test of triathlon endurance, and with 12 weeks left there's no room for messing about. It's time to knuckle down, or it'll be a very long day out. Thankfully these plans are designed to get you fit and race ready without taking over your life. They follow on from the Ironman Foundation plan we published in *Triathlon Plus* Issue 23. Don't worry if you didn't see it, because as long as you've trained consistently over the last 12 weeks, there's no reason why you can't start now.**

There are two plans to choose from here, one for the 'time poor' which takes up to 13 hours per week, and one for 'time rich' which takes anything up to 16 hours. They're by no means easy – after all you'll be racing a 3.8km swim, 112-mile bike ride and 26.2-mile run, but the sessions do progress over time, so it doesn't all come at once. You'll need to spend a big chunk of your weekends training, so it's a good idea to run it past your

family and friends first. Then stick a copy of your training plan onto the fridge so everyone can see it.

The longest run I've set is two hours. I know you'll be out for longer on race day, but keeping it lower enables you to train consistently, rather than breaking down with injury and fatigue. After all, it's what you do regularly in training that counts, not what you do once or twice. I've read that multiple Ironman World Champ Dave Scott never ran further than 13 miles in training either, and it didn't do him any harm. Finally, regardless of what the plan says, if you start losing your appetite, struggle to sleep or become abnormally grumpy take at least a couple of days rest.

## Coach's Tips

- Train in your race kit when possible
- Train using the same nutrition you plan to use on race day
- Train on your race-day bike when possible

## Are these plans for you?

To start these Ironman training plans you should already be able to:

- Swim 2,500m front crawl, non-stop
- Ride your bike for at least 3 hours
- Run non-stop for 90 minutes

## How it works

Get your guide ready to go

Cut out the guide following the dotted outline

Fold the guide in quarters using the fold guides

Now carry it with you for reference while training

**Triathlon PLUS**  
**YOUR**  
**12-WEEK**  
**PLAN**

**13 hours per week**

# IRONMAN

**FOLLOW THIS PLAN TO GET IRONMAN RACE READY IN LESS THAN 13 HOURS PER WEEK**

## TRAINING ZONES

**USING THESE** Training Zones will help you train at the right intensity for each session. This helps develop specific aspects of your fitness, as well as making sure you don't overdo it. You can either estimate your intensity using the Training Zone descriptions, or use a heart-rate monitor for a more precise measure. If you use a heart-rate monitor, use the percentages provided and subtract them from your maximum heart rate to calculate your zones. Tools like cycle power meters and GPS watches will also help track your training progress, but they're not essential for these plans.

These training zones are only a guide, so don't worry about being overly precise with heart rates because they'll fluctuate anyway. It's good to be mindful of your intensity but it's even more important that you get out there and enjoy your training.

**ZONE 1: Recovery**

60 to 65% of max. Easy pace, feels nice and light.

**ZONE 2: Steady**

65 to 75% of max. Fairly easy pace. Easy enough so that you could breathe just through your nose if you wanted to.

**ZONE 3: Tempo**

75% to 80% of max. Fairly hard but sustainable pace.

**ZONE 4: Race Tempo**

80 to 90% of max. Hard pace. Sustainable, but requires real focus.

**KEY**

**WU** Warm up **WD** Warm down **MAIN** Main set **FC** Front crawl **PULL** Front crawl using a pull float **RI** Rest interval **BUILD** Swim each 25m slightly faster than the previous **K** Kick **NS** Negative split (swim the second half of a rep faster than the first) **REC** Recovery **DESC** Descending (swim each rep faster than the one before) **BI** Bilateral (breathe every third stroke) **BREAST** Breaststroke **BACK** Backstroke

## TRAINING ZONES

**USING THESE** Training Zones will help you train at the right intensity for each session. This helps develop specific aspects of your fitness, as well as making sure you don't overdo it. You can either estimate your intensity, using the Training Zone descriptions, or use a heart-rate monitor for a more precise measure. If you use a heart rate monitor, use the percentages provided and subtract them from your maximum heart rate to calculate your zones. Tools like cycle power meters and GPS watches will also help track your training progress, but they're not essential for these plans.

These training zones are only a guide, so don't worry about being overly-precise with heart rates because they'll fluctuate anyway. It's good to be mindful of your intensity but it's even more important that you get out there and enjoy your training.

- ZONE 1: Recovery**  
60 to 65% of max. Easy pace, feels nice and light.
- ZONE 2: Steady**  
65 to 75% of max. Fairly easy pace. Easy enough so that you could breathe just through your nose if you wanted to.
- ZONE 3: Tempo**  
75% to 80% of max. Fairly hard but sustainable pace.
- ZONE 4: Race tempo**  
80 to 90% of max. Hard pace. Sustainable, but requires real focus.
